PROFESSIONAL SUMMARY

Front-End Engineer specializing in React.js and Next.js to build high-performance SaaS platforms, corporate sites, clinical dashboards, and e-commerce apps. Expert in converting complex business requirements into scalable UI architectures, optimizing core web vitals, and establishing seamless RESTful API integrations. Dedicated to delivering accessible, pixel-perfect, and highly maintainable production-ready web solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Sass.
Libraries/Frameworks: React.js, Next.js (v15/16), Redux Toolkit, React Query, Context API, Tailwind CSS, Material UI (MUI), SCSS, Styled Components, Framer Motion, Shadcn/UI, Swiper.js.
Databases: Supabase, Firebase, MongoDB (Basic), MySQL (Basic).
Tools: Git, GitHub Actions (CI/CD), Postman, REST APIs, Vercel, Netlify, Custom Domain Setup & DNS Management (SSL, CNAME), VS Code, Apidog, Lighthouse,Profiler, Redux DevTools, TanStack DevTools.
Soft Skills: Cross-Functional Team Collaboration, Technical Problem-Solving, Adaptability, Effective Communication, Time Management, Attention to Detail

---

TECHNICAL PROJECTS

GKL – Corporate Website for Law Firm | Front-End Developer | Live Site

A multi-page corporate portfolio web platform tailored for premium corporate legal clients to establish a high-performance digital presence.

- Architected a multi-page corporate portfolio platform using Next.js 16 and React 19 to establish a high-performance digital presence for corporate legal clients.
- Implemented structured onboarding forms and dynamic mailto components utilizing Tailwind CSS to streamline appointment requests and inquiries.
- Optimized site-wide core web vitals and metadata hierarchies utilizing Next.js Server-Side Rendering (SSR) to maximize SEO visibility.

Arsl Healthcare System | *Front-End Developer* **(Fikritak Team)** | Live site

A comprehensive enterprise healthcare management system designed to centralize clinical workflows, pharmacy tracking, and doctor-patient communications.

- Architected a scalable role-based access control dashboard using Next.js 15, MUI System, and Redux Toolkit to isolate 8+ core healthcare administration modules.
- Developed real-time collaborative communication features including chat, interactive video consultations, and booking calendars utilizing Socket.io-client and FullCalendar.
- Engineered secure client-side financial flows and session monitoring components utilizing Next.js Server Actions, Next Auth, and internal wallet endpoints.

Qira – SaaS Platform Landing Page | *Front-End Developer* | Live site

A high-converting SaaS landing page designed to present an all-in-one restaurant management platform and streamline prospective client onboarding.

- Engineered a high-converting, fully responsive landing page utilizing Next.js 15, React 19, and Tailwind CSS to showcase core platform modules and operational workflows.
- Optimized core web vitals, metadata hierarchies, and custom Open Graph media assets to maximize SEO ranking, page load speed, and social sharing visibility.
- Configured custom domain routing, DNS records, and SSL certificates via Vercel to launch qira.ltd seamlessly for live client access.

PROFESSIONAL EXPERIENCE

Front-End &Tech Support Engineer | *Contract (Moawen Platform)* | Remote | Dec 2025 – Oct 2026

- Architected modular front-end layouts and 10+ RBAC/KYC dashboard modules using React.js, Next.js, RTK, and React Query to secure operational workflows.
- Integrated 20+ secure RESTful API endpoints with strict form validation criteria using React Query to streamline multi-step transactional data processing.
- Provide ongoing hourly technical support, client-side troubleshooting, and feature maintenance to ensure high system availability and performance.

Front End Developer | *Freelancer* | Gaza, Palestine | 2025 – Present

- Delivered 7+ production web apps (SaaS, dashboards, e-commerce) and engineered 15+ responsive interface templates using Tailwind CSS.
- Reduced page load latency figures by 30%+ through targeted client-side rendering strategies, query caching, and core web vitals optimization.
- Leveraged AI-assisted development tools including Cursor, Claude Code, and Gemini to improve feature deployment velocity while maintaining code quality.

EDUCATION

Al-Azhar Gaza University | *Bachelor of Software Engineering* | Gaza, Palestine 2025

- **Relevant Coursework:** Web Development, OOP, Data Structures & Algorithms, Database Systems, Software Testing, Cloud Computing, Requirement Engineering.

CERTIFICATIONS & PROFESSIONAL TRAINING

- Top-tech Center – Java Programming Course | 2021.
- Kuwaiti Training Center – Full Stack Web Development | 2021.
- Udemy (Jonas Schmedtmann) – The Ultimate React Course 2024: React, Next.js, Redux, and more.
- Elzero Web School & Self-Directed Learning - Advanced Front-End Development Track.
