PROFESSIONAL SUMMARY

Front-End Engineer specializing in React.js and Next.js to build high-performance SaaS platforms, corporate sites, clinical dashboards, and e-commerce apps. Expert in converting complex business requirements into scalable UI architectures, optimizing core web vitals, and establishing seamless RESTful API integrations. Dedicated to delivering accessible, pixel-perfect, and highly maintainable production-ready web solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Sass.

Libraries/Frameworks: React.js, Next.js (v15/16), Redux Toolkit, React Query, Context API, Tailwind CSS, Material UI (MUI), SCSS, Styled Components, Framer Motion, Shadcn/UI.

Databases: Supabase, Firebase, MongoDB (Basic), MySQL (Basic).

Tools: Git, GitHub, GitHub-Pages, Postman, Axios, REST APIs, Vercel, Netlify, VS Code, Apidog, Lighthouse, Chrome DevTools, Profiler, Redux DevTools, TanStack DevTools.

TECHNICAL PROJECTS

GKL – Corporate Website for Law Firm | Front-End Developer | [Live Site](#)

A multi-page corporate portfolio web platform tailored for premium corporate legal clients to establish a high-performance digital presence.

- Architected a multi-page corporate portfolio web platform using Next.js 16 and React 19 to establish a premium, high-performance digital presence tailored for corporate legal clients.
- Implemented structured client onboarding forms by integrating custom booking endpoints to seamlessly transmit appointment requests from the user interface to the company's system.
- Programmed dynamic communication components featuring native mailto links utilizing Tailwind CSS to streamline direct email inquiries.
- Optimized site-wide core web vitals and metadata hierarchies utilizing Next.js Server-Side Rendering (SSR) to maximize SEO visibility and reduce initial load times across all pages.

Arsi Healthcare System | *Front-End Developer (Fikritak Team)* | [Live site](#)

A comprehensive enterprise healthcare management system designed to centralize clinical workflows, pharmacy tracking, and doctor-patient communications.

- Architected a scalable role-based access control dashboard using Next.js 15, MUI System, and Redux Toolkit to cleanly isolate and manage 8+ core healthcare administration modules.
- Developed real-time collaborative communication features including chat, interactive video consultations, and booking calendars utilizing Socket.io-client and FullCalendar to enhance remote patient care.
- Engineered secure client-side financial flows and session monitoring components utilizing Next.js Server Actions, Next Auth, and internal wallet endpoints to guarantee secure data persistence.

Masa Toys Store | *Front-End Developer* | [Live Website](#)

An optimized e-commerce web application featuring advanced catalog filtering and a secure shopping cart workflow.

- Developed an e-commerce platform with 5+ reusable UI components and advanced catalog filtering using React.js and Vite to streamline shopping workflows.
 - Implemented responsive user experience enhancements and data placeholder elements utilizing custom skeleton loaders to eliminate perceived loading latency during product retrieval.
 - Integrated scalable RESTful API endpoints for inventory tracking and device-optimized layouts using Axios and CSS Grid to ensure resilient error handling and cross-browser compatibility.
-

PROFESSIONAL EXPERIENCE

Front-End Engineer | *Contract* (Moawen Platform) | Remote | Dec 2025 – Present

- Contributed to the modular front-end architecture of a bilingual services marketplace using React.js and Next.js to establish a high-converting landing page and an administrative dashboard.
- Developed 10+ scalable dashboard management modules covering role-based access control (RBAC) and KYC verification using RTK to secure operational workflows, and React Query.
- Integrated 20+ secure RESTful API endpoints with strict form validation criteria using React Query to streamline multi-step transactional data processing.

Front End Developer | *Freelancer* | Gaza, Palestine | 2025 – Present

- Delivered 4+ production-ready web applications including custom SaaS platforms, client administrative dashboards & interactive e-commerce systems to transform diverse client requirements into functional digital products.
 - Reduced page load latency figures by 30%+ through targeted client-side rendering strategies and query caching patterns to maximize core web vitals optimization.
 - Engineered 15+ responsive interface templates featuring cross-browser rendering configurations using Tailwind CSS to execute mobile-first design principles.
 - Leveraged AI-assisted development tools including Cursor, Claude Code, and Gemini to improve feature deployment velocity and maintain production code quality.
-

EDUCATION

Al-Azhar Gaza University | *Bachelor of Software Engineering* | Gaza, Palestine 2025

- **Relevant Coursework:** Web Development, OOP, Data Structures & Algorithms, Database Systems, Software Testing, Cloud Computing, Requirement Engineering.
-

CERTIFICATIONS & PROFESSIONAL TRAINING

- Top-tech Center – Java Programming Course | 2021.
- Kuwaiti Training Center – Full Stack Web Development | 2021.
- Udemy (Jonas Schmedtmann) – The Ultimate React Course 2024: React, Next.js, Redux, and more.
- Elzero Web School & Self-Directed Learning - Advanced Front-End Development Track.
