## SUMMARY

Front-End Developer specializing in React.js and Next.js with experience building scalable SaaS platforms, dashboards, and e-commerce applications. Skilled in creating high-performance, modern UI/UX using Tailwind CSS and MUI with strong expertise in state management and frontend architecture. Focused on delivering production-ready, responsive web applications with clean code and seamless REST API integration.

---

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Sass.

**Libraries/Frameworks:** React.js, Next.js, Redux, React Query, Context API, Tailwind CSS, Material UI (MUI), SCSS, Styled Components, Framer Motion, Shadcn/UI.

**Databases:** Supabase, Firebase, MongoDB (Basic), MySQL (Basic).

**Tools:** Git, GitHub, Postman, Axios, REST APIs, Vercel, Netlify, VS Code, Apidog, Lighthouse.

**Core Concepts:** Responsive Design, State Management, Performance Optimization, Component Reusability, Maintainable Code, SEO Optimization, Accessibility, API Integration

---

## TECHNICAL PROJECTS

### Masa Toys Store | *Front-End Developer* | [Live](#)

- Constructed a full-featured e-commerce platform with advanced product filtering, search functionality, shopping cart, and multi-step checkout flow using optimized Redux state management
- Enhanced user experience with smooth animations using Framer Motion and Swiper.js carousels, integrated skeleton loaders during data fetching to improve perceived performance
- Integrated Axios for RESTful API communication with server-side product data, inventory management, and order processing with comprehensive error handling and retry logic

### WSL Platform (Landing + Dashboard) | *Front-End Developer* | [Live](#)

- Developed dual-platform application with responsive landing page and interactive dashboard using React.js and React Query for server-side, implementing modern UI/UX design principles with Tailwind CSS, Framer Motion Animation.
- Built animated hero sections and smooth page transitions with Framer Motion, and implemented skeleton loading states to optimize perceived performance during data initialization
- Architected scalable, reusable component library with consistent styling and design tokens, enabling rapid feature development and maintainable codebase across multiple pages and workflows

### Arsi Healthcare System | *Front-End Developer (Fikritak Team)* | [Live](#)

- Engineered comprehensive healthcare platform dashboard supporting role-based access control for admins, doctors, and patients using Next.js, MUI System, and Redux for centralized state management

- Implemented critical healthcare features including appointment booking system, emergency services management, video consultations integration, real-time chat system, pharmacy module, wallet payments, and content management, users managements
- Developed responsive, accessible UI with Tailwind CSS, integrated Next.js API routes and server actions for backend communication, implemented JWT authentication with Next Auth for secure user sessions

### **Al-Ghaith & Al-Kharif (Law Firm Website) | *Front-End Developer (Fikritak Team)* | [Live](#)**

- Built enterprise-grade corporate website for law firm using Next.js with Server-Side Rendering and Static Generation, optimizing for SEO and Core Web Vitals to ensure maximum discoverability
- Implemented Server Actions and Fetch API to dynamically retrieve and display legal articles, case studies, and firm content from backend, enabling real-time content updates without client-side re-renders
- Designed premium, professional UI using Tailwind CSS and Shadcn/UI component library, implementing pixel-perfect responsive layouts and optimizing performance for corporate credibility and user retention

## **PROFESSIONAL EXPERIENCE**

### **Front End Developer | *Freelancer* | Gaza, Palestine | 2025 – Present**

- Delivered multiple production-ready web applications including Landing Pages, SaaS platforms, dashboards, and e-commerce systems
  - Worked directly with clients to transform requirements into scalable UI systems using React.js and Next.js, and integrated tools.
  - Improved performance through optimized rendering, state management (Context, Redux, React Query), and API integration.
  - Built responsive interfaces deployed on Vercel with cross-browser and mobile compatibility
  - Used AI development tools (Cursor, Claude Code, Copilot) to speed up development and enhance code quality
- 

## **EDUCATION**

### **Technical Training & Online Learning**

- Top-tech Center – Java Programming Course | 2021.
- Kuwaiti Training Center – Full Stack Web Development | 2021.
- Udemy & Elzero Web School – React.js, Next.js, State Managements, Redux, React Query, Tailwind CSS, REST APIs | 2022 – 2025.

### **Al-Azhar Gaza University | *Bachelor of Software Engineering* | Gaza, Palestine**

- **Relevant Coursework:** Web Development, OOP, Data Structures & Algorithms, Database Systems, Software Testing, Cloud Computing, Requirement Engineer.
